

## Mini-Lesson G: Tables, Equations, and Graphing

### Plotting points (x, y)

\*Start at the origin

\*x: \_\_\_\_\_

\*y: \_\_\_\_\_

#### Ex. 1

Plot the following points.

A: (2, 5)

B: (-3, 1)

C: (1, -2)

D: (-4, 0)

E: (0, 3)

### How to complete a table:

Substitute in your known value and simplify to find your unknown value.

#### Ex. 2

Complete the table to find the values of y.

$y = -3x - 1$	
x	y
-2	
0	
3
